REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance.

This invention relates generally, to an in vivo camera system and, in particular, to classifying images captured by an in vivo camera system according to anatomical structure.

Based on applicant's amendment, with respect to claim 1 representative of claims 10 and 19 the closest prior art of record (Horn and Meron), Horn reference is directed to presentations of data streams and to a system and method for presenting in-vivo data, and Meron reference is directed to a method for identifying a target location in the gastrointestinal tract and for direct delivery of a device to the identified location, but neither Horn nor Meron teach or suggest, among other things, "a gastrointestinal atlas that includes a list of individual anatomical structures and characterization data of the individual anatomical structures, and classification engine that analyzes the examination bundle and the gastrointestinal atlas to identify the anatomical structure depicted in the in vivo image".

These key features in combination with the other features of the claimed invention are neither taught nor suggested by (Horn and Meron) prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
